

Vishvajit Jadhav

Software Engineer – Java Backend & AI Engineering (Spring Boot | LLM/RAG | React)

+91 9767875421 | vishvajitjadhav01@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#) | Pune, Maharashtra

Software Engineer specializing in Java/Spring Boot backend systems and production LLM/RAG integration. Proven in building concurrency-safe transactional workflows, REST microservices, payment integrations (Stripe), and end-to-end AI features with React frontends and vector search. Currently developing AI-driven applications at Speed IT Innovations.

Technical Skills

Languages: Java, SQL, JavaScript, Python

Backend: Spring Boot, REST APIs, Microservices, JPA/Hibernate, Multithreading, Design Patterns, System Design

AI Engineering: LLM Integration, RAG Pipelines, Embeddings & Vector Search, Prompt Engineering

Databases: PostgreSQL, MySQL (Indexing, Joins, Query Optimization)

Frontend: React, JavaScript (ES6+), HTML, CSS

Tools & Cloud: Git, Docker, Maven, JUnit, Postman, Agile/Scrum, AWS (EC2, S3)

Experience

Speed IT Innovations, AI Developer, Pune

May 2026 – Present

- Working on production LLM applications — backend LLM orchestration and structured outputs in Java/Spring Boot
- Implemented LLM guardrails (input/output validation, topic restriction, fallback flows) for reliable responses
- Reduced end-to-end LLM latency through prompt optimization, response streaming, and caching

Consultadd Inc., Software Engineer (Trainee), Pune

May 2025 – Oct 2025

- Built concurrency-safe, transactional backend services in Java/Spring Boot for US-based SMB clients
- Optimized SQL queries and database access paths, improving API response times on large datasets
- Resolved production issues via structured debugging and logging, improving system stability
- Translated client requirements into working demos and business-aligned APIs with cross-functional teams

Independent AI Engineering (Self-Directed)

Nov 2025 – Apr 2026

- Specialization sprint in GenAI and full-stack Java; built and shipped three applications (below)
- Covered RAG pipelines, LLM integration, payment flows, and concurrency-safe backend design

Elite Softwares Pvt. Ltd., Software Engineer Intern, Pune

Jan 2023 – Dec 2023

- Developed RESTful APIs in Java/Spring Boot and designed relational schemas for internal applications
- Wrote optimized SQL for CRUD operations, backend validations, and application performance

Projects

Yatrik – Scalable Hotel Booking Platform | Java, Spring Boot, PostgreSQL, Stripe | [GitHub](#)

2025 – 2026

- Engineered booking backend with pessimistic/optimistic locking to prevent double-booking under load
- Implemented dynamic pricing and Decorator-pattern-based service composition for modular design
- Integrated Stripe payments with idempotent, state-safe transaction handling and clean API boundaries

AI Interview Copilot (Live) | React, Spring Boot, LLM APIs | [GitHub](#) | [Live](#)

Mar 2026

- Built and deployed a full-stack app generating personalized interview preparation strategies
- Designed REST APIs with structured LLM workflows and schema-validated responses rendered in React

RAG File Search System | Python, Embeddings, Vector Search, LLM | [GitHub](#)

Dec 2025

- Built a retrieval pipeline: chunking, embedding generation, and vector similarity search over documents
- Integrated LLM for context-grounded answers, improving retrieval accuracy over keyword search

Education

Savitribai Phule Pune University, PVPIT Pune

B.E. Computer Engineering

2020 – 2024

CGPA: 8.49

Certifications

Generative AI with Large Language Models

DeepLearning.AI

2026

AWS Certified Developer – Associate (In Progress)

Amazon Web Services

Target: Sep 2026
